Dear Thomas

**Re: Welcome Reception at the First Meeting of the Federation of the European Societies of Neuropsychology (ESN), 2-5 September 2008, Edinburgh**

On behalf of my colleagues, fellow-organizers and the delegates at the First Meeting of the European Societies of Neuropsychology in Edinburgh, I would like to thank you for your wonderful performance at our opening night reception!

Everybody attending the reception was delighted and enjoyed your performance immensely. They especially appreciated your customized approach, e.g. the convincing combination of neuroscience themes together with your magic (some delegates even asked me whether you are in fact a neuroscientist!!!).

Your 'interactive experiments to activate the brains of the audience' fitted perfectly with the theme of our conference and were a playful way to illustrate some of the topics that would be discussed later in the week. It was interesting to see your experiment for testing our mental flexibility after the Whisky Tasting, watch your "proof" of the apparent acuity of the mirror neuron system with a baffling card trick, and see the Head (no pun intended) of a brain imaging department scanned by your 'mobile' fMRI-device!

Needless to say, we can highly recommend your services for any scientific gathering or similar event and wish you all the best for the future!

With kind regards

Dr Sarah E. MacPherson (Chair of the Local Organising Committee, ESN 2008)
