Dear Mr. Fraps, dear Mr. Hartling,

I would like to thank you very much for presenting your unique show *Metamagicum* at CERN. The feedback we got from our Summer Students as well as regular Staff attending the show was very positive. The main auditorium proved to be the perfect venue for your funny and intelligent trip through the boundaries of physics, philosophy and magic.

Some of us are still pondering about your proverbial „wonders of science” and strange inventions that according to the laws of nature shouldn’t work at all, but somehow do! Especially your „discovery” of the much sought-after Higgs-Boson was quite a surprise to us and should qualify you to be at least on the list of applicants for a future nobel-prize...

Seriously, all participants were immensely entertained by your unique mix of science facts and fictions, as you probably could tell from the reactions in the auditorium. We can recommend your show for scientific conferences, meetings or any event related to the public understanding of science and hope you’ll find many more happy audiences!

With best wishes for the future and kind regards,

Ingrid Schmid
Coordinator for Student Programmes
